1	Miaza Hameed Gujar	MNA
2	News Reporter	

Proceedings....

We reached Maiza Hameed home at 9 00 AM , from there we move towards 48 NP , this visit was conducted basically to highlight the issue of 48 NP for parliamentarians and the government; model villages were constructed in the post 2010 floods period by the former/current CM teams but is facing many issues due to non availability of electricity .

As MNA reached 48 NP, we first visited sanjha vehra. She was very happy and glad to see children's activity she also heard the alphabets ABCD/ from random students and was pleased to see a positive response she also met staff of sajnha vehra and appreciated their efforts and commitment. We then moved towards the model village school (PEF supported) where she was also very happy to see the students confidence and hard work.

We then moved towards the vocational center equipped by TEVTA and managed by ITA where she was surprised to see the vocational trades running without light she appreciated all students and staff that they are continuously working in this environment where a basic facility is missing from life....

She also promised to highlight this issue in front of government as she became very disappointed when she saw many electronic machines kept idle and not used by students only because of the problem of electricity.

She also conducted a meeting with TEVT staff managed and funded by ITA; then we moved back to the office at 1:00.
